[Tools Pro 1.7.8.2 For Macos](#)

The screenshot shows the Thinkosoft Tools Pro 1.7.8.2 interface for managing an iPhone. The main window displays 'Jakub's iPhone' with a live view of the device's screen showing the time 18:07 and the date Monday, 22 July. Below the device view are options for 'Screenshot', 'Reboot', and 'Refresh', along with a checkbox for 'Sync over Wi-Fi (not working?)'. To the right, the 'Device Information' and 'Device Verification' sections are visible. The 'Device Verification' section shows 'Device is genuine' with a 'Generate report' button. Below this, various hardware components are listed with their status: Production info (6 items, Normal), Battery info (5 items, Normal), Mainboard info (5 items, Normal), Hard disk info (5 items, Normal), Camera info (4 items, Normal), TouchID info (3 items, Normal), and Screen info (3 items, Normal). A 'Retest' button is located at the bottom of the verification section. The interface includes a sidebar with 'My Device', 'Apps', 'Photos', 'Music', 'Videos', 'Books', 'Info', and 'File Explorer'. The top bar shows 'My Device' and 'Toolbox' tabs, and the bottom of the window shows the Windows taskbar with the search bar and system tray.
